Bob,

The North Dakota Department of Health has reviewed your proposed BART CALPUFF modeling protocol for MDU Heskett Station Unit 2 titled, "CALPUFF Visibility Modeling Protocol: MDU Heskett Unit 2 BART Analysis" (November 2009). We have determined that this protocol is acceptable for BART CALPUFF modeling for Heskett Unit 2.

If you have any questions, please contact me.

Steve

Steve,

I hope that you have received our updated Heskett BART modeling protocol by now. We are hoping for a quick review (by you and by any EPA and FLM reviewers) so that we can quickly proceed with the modeling. If you have an approximate schedule for the review and approval (hopefully), let me know. We are hoping to be doing final modeling this week.

Regards,

Bob Paine, CCM, QEP
